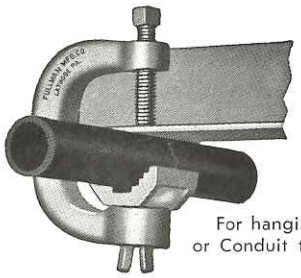
# Latrobe Pipe or Conduit Hangers

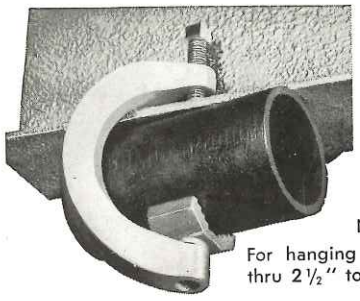
**MOST COMPLETE LINE with addition of 2 new sizes to oldest established standards in the industry**

Only 4 sizes of the 470 and 470-AL series of Conduit Hangers needed to accommodate from ½" conduit up through 2½" conduit – only 4 different size Conduit Hangers to cover this wide range of conduit sizes. Also, with the 470-AL series it is now possible to choose either an aluminum hanger or a malleable hanger.

The saddle or pipe support can be turned 360°, permitting pipe to run parallel or at right angle, unlike the special purpose Right Angle or Parallel Clamps.



No. 470-471
For hanging ½" thru 1½" Pipe or Conduit to steel beams ⅜" thick.



No. 472-473
For hanging Pipe or Conduit 1½" thru 2½" to steel beams ⅜" thick.

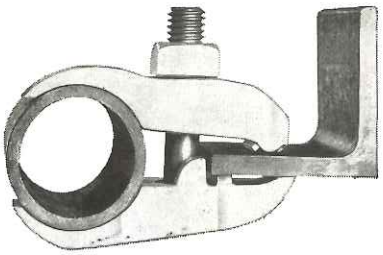
# DOUBLE SAFETY GRIP CLAMPS



PARALLEL TYPE

The "Latrobe" pipe or conduit clamp has a positive grip. Case hardened tool steel is inserted in grip end of the clamp – this is in the form of an inverted V shape to give a double bite into the steel frame work without drilling any holes.

Edge Clamps available for ½ inch thru 3 inch pipe or conduit – see complete series on reverse side.
